

The Night Noises

By Zahra Rafiyath

As the moon shines brightly,
The javelina snorts, and the coyote goes, "AWOO"
And the crickets chirp, and the owl goes, "HOO, HOO"

These are all the noises we hear,
When we know the desert night is near
Sometimes they're full of delight,
And sometimes they're full of fright!

In the morning we can see
The sun is shining with its heat
Now we know the night has ended
Because the colors of the sky have changed and blended
