

The Sonoran Desert

When I look, I see

A desert full of life.

But it wasn't always like this.

It all began with Pangea.

The most recent of the supercontinents,

Climates were different then.

Arizona's ocean had begun.

Thousands of deceased creatures
of the majestic sea,

lie at the bottom

of our grand canyon.

Years after Pangea,

Life began to change.

Things got a bit hot.

The Sonoran Desert began!

But it wasn't like the Gobi Desert

it was much cooler.

Life was perfect,

for desert life.

Cities now bask

in the hot desert sun's light.

Our desert is special,

And I know I'm right
